# Rhonda Allison Cosmeceuticals

Empowering and inspiring skin care professionals to advance is at the heart of everything done at Rhonda Allison Cosmeceuticals. They believe no two skins are the same, and real results are only delivered through a customized approach to skin care, using fresh ingredients backed by science.

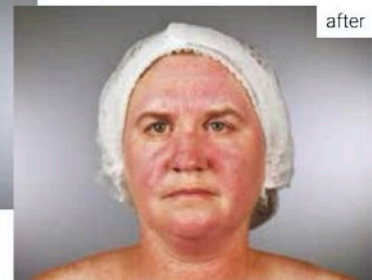

RHONDA | **Ra** | ALLISON

A perfect choice for inflamed, sensitive, and reactive skin, the Rosacea Facial provides a high degree of environmental protection to calm all stages of rosacea. It uses sea buckthorn oil, rhodiola rosea root, and salicylic acid to reduce redness and inflammation, provide antiseptic support, and nourish and soothe the skin.

The goal with Rhonda Allison Cosmeceuticals' Rosacea Rescue's Rosacea Facial is to infuse the skin with ingredients that reduce redness, bacteria and inflammation, and strengthen it. This corrective facial starts with the Beta Green Tea Cleanser to minimize surface bacteria, followed by the Salicylic Peeling Cream and Milk Mask combination to boost exfoliation and provide healing and antibacterial support.

Next, an active cocktail of Mandelic Arginine Serum, Sensitive Skin Complex, 50+ AHP Booster, and Chamo-Weiss Liposome Powder infuses the skin with nourishing and strengthening ingredients. This is followed by Omega 6 EFA, which inhibits bacteria, reduces inflammation, increases hydration, and provides the building blocks for healthy skin.

To calm and hydrate the skin, the Milk Mask is blended with Mandelic Arginine Serum to deliver a gentle but potent dose of amino acids and antioxidants. While the mask is on,

chilled ice globes are rolled over the skin to further reduce inflammation.

Sensitive Skin Complex is applied once more to inhibit facial redness, while the Exotica Rhodiola locks in moisture, delivers powerful pro-youth support, and strengthens the skin's protective barrier.

The treatment finishes with a mineral-based protection formula, either Sheer Tint Finisher SPF18 or Daytime Defense SPF30, to protect skin from ultraviolet rays.
