

SKIN INC.®

The Choice for Serious Spa Professionals & Owners

PRODUCT ROUNDUP [Products, Equipment & Services]

Let There Be Light...eners

Help your clients treat their hyperpigmentation or dark spots with these skin brightening products.

1. Skin Brightening Enzyme Rhonda Allison

<https://rhondaallison.com>

Skin Brightening Enzyme uses natural papaya enzymes, along with arbutin (L), kojic and azelaic acids to digest dead cells and inhibit melanin synthesis and tyrosinase for bright, glowing skin. Salicylic acid provides anti-inflammatory and antiseptic support, while spinach whey provides phyto-nutrients and antioxidants.
