## JAR DECONSTRUCTED

licorice root, appears to be a promising therapeutic solution for the management of atopic dermatitis.<sup>8</sup>

anti-inflammatory properties and mechanisms of compounds isolated from licorice. The authors concluded licorice extract itself

**Soothing the skin is also the main action of licorice in Rhonda Allison's Naturalé Mega Brightening Serum, where a blend of botanical brighteners and antioxidants in the serum reduce melanin formation and brighten sallow complexions, while licorice and willow herb extract deliver anti-inflammatory and soothing properties.**

aging skin in KM Herbals' Licorice Lemon Nighttime Serum, where it improves the look of discoloration and scarring while soothing, hydrating, and brightening. Lemon and foraha oil work alongside licorice to balance and brighten the complexion.

FarmHouse Fresh uses licorice as an antioxidant in its recently launched Watermelonaid. This gelée serum is formulated with licorice extract for its glabridin content to soothe sensitive skin and improve the visible look of uneven skin tone.

Licorice is the star of the show in Éminence's Bright Skin products, such as its Cleanser, Targeted Treatment and Licorice Root Exfoliating Peel, among others. In the peel specifically, the ingredient brightens pigmentation, reduces the appearance of fine lines and improves skin elasticity.

WODA European Natural Skin Care utilizes licorice to brighten as part of its Radiant Brightening Serum, which was created to reduce dark spots.

DermaSwiss incorporates licorice in its acne products (Purifying Cleansing Gel, Normalizing Lotion, Clarifying Serum and Retinewal Emulsion) due to its anti-inflammatory and skin lightening benefits. Soothing the skin is also the main action of licorice in Rhonda Allison's Naturalé Mega Brightening Serum, where a blend of botanical brighteners and antioxidants in the serum reduce melanin formation and brighten sallow complexions, while licorice and willow herb extract deliver anti-inflammatory and soothing properties.

Also to reduce inflammation, Pevonia includes licorice in its RS2 collection, which was formulated to address rosacea. In its RS2 Lotion Care Cream and Concentrate, licorice provides anti-inflammatory

The bioactive compounds in licorice have well-known depigmenting properties.
